PLASTICS Molding Company			Management of Production Tooling	
QMS PQ13	Rev A	Date 09-19-17	Procedure Authority: Production Department Manager	

Purpose: The purpose of this procedure is to describe and direct our activities associated with managing production tooling.

Scope: This procedure is applicable to tool design, manufacturing, revisions, identification, storage, handling, and associated records.

Responsibility: The Department Manager responsible for the associated production is responsible for administering this procedure.

Definitions: NA

Reference Documents: NA

Procedure:

- 1. The Production Manager, will provide reasonable assurance that production tooling is managed in such a way as to provide:
 - a) Maintenance and repair facilities and personnel;
 - b) Storage and recovery;
 - c) Set-up instructions
 - d) Tool-change programs for perishable tools;
 - e) Tool design modification documentation, including engineering change level of the product;
 - f) Tool modification and revisions to documentation;
 - g) Tool identification, status, ownership, and location.
- 2. As new or existing tooling is realized for production processes, the Department Manager will see that appropriate identification is applied to insure proper, storage, and retrievability.
- 3. A storage system will be facilitated such to guaranty tool integrity.
- 4. A handling system will be facilitated such to ensure safety to the tool and personnel.
- 5. Records will be maintained to represent production tooling management and to afford quick reference to tooling status as appropriate.
- 6. If at any time work is outsourced, associated production tooling will be monitored and managed, consistent with this procedure.
